

- Environmental Awareness and Communications Training
- Compost Training
- Community Composting
- Implementation of communication initiative
- RISE Training
- Sustainable Land Management Training
- Assessment of potentials in cashew value chains in the Caribbean
- Good Agricultural Practices training
- Biogas Digester and Natural Pest Control and Bio-stimulants Training
- Sustainable land management training for extension officers

Sustainable land management training

INTERVENTIONS IMPACTING THE KINGSTOWN WATERSHED AND MARINE ECOSYSTEM

Assessment of potentials in the cashew Value chains in the Caribbean

- Capacity building for staff of Marine Partner
- Procurements of equipment and materials for monitoring and administrative functions
- Institutional strengthening through:
 - ⇒Review and strategic action planning for amendments to the National Legal and Organisational Framework for Sustainable Management of Marine Reserves in Saint Vincent
 - ⇒Development of SCMMA Operational Structure and Financing
 - ⇒Development of the SCMMA Management and Operations Plan
 - ⇒Development of the SCMMA Communication Strategy

Capacity Building

Equipment Procurement

Institutional Strengthening **Saint Vincent** and the Grenadines is comprised of thirty four islands. Saint Vincent the largest island located at 13°15' N latitude, and 61°1' W longitude. It has the most rugged terrain of the island grouping with the highest point at 1234 m at the top of the La Soufriere Mountain found within the central range. La Soufriere is also an active volcano which last erupted in 1979. Saint Vincent has an average annual rainfall of 3800 mm in the central mountain area and around 2000 mm on the coast. The average yearly temperature is 27°C. The rainy season is from May to October. The focus of the Programme is the South Coast Marine Managed Area and the hinterlands which impact the same, namely the Kingstown watershed and to a lesser extent, the Marriaqua Area, within the Montreal Watershed, by virtue of ocean currents. The initiative partners in this State are the West Indies Farmers' Association and the National Parks, Rivers and Beaches Authority. The focus of initiatives in this State was Communication. The initiatives received support from the Ministry of Agriculture and the School of Agricultural Forest and Food Sciences of the Bern University of Applied Science, among others.
